PROFESSIONAL SUMMARY

Full Stack Developer experienced in building scalable web applications and SaaS-style platforms using React.js, Next.js, TypeScript, Node.js, Express.js, and PostgreSQL. Skilled in developing RESTful APIs, authentication and authorization systems, multi-tenant architectures, AI-powered features, and modern frontend applications. Focused on clean architecture, maintainable code, and building reliable software solutions.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Shadcn/ui, Framer Motion

Backend: Node.js, Express.js, RESTful APIs, API Development, JWT Authentication, Better Auth, Cookie-based Authentication

Database & ORM: PostgreSQL, Prisma ORM, MongoDB, Mongoose, Firebase

AI & Integrations: OpenRouter AI, RAG Architecture, Stripe API, SSLCommerz, Cloudinary

Tools & Platforms: Git, GitHub, Cursor, VS Code, Postman, Figma, Vercel, Netlify, Render, MongoDB Atlas

Core Concepts: Authentication & Authorization, RBAC, Multi-Tenant Architecture, Database Design, Software Architecture, State Management, Component Architecture, Protected Routes, Error Handling, Form Validation

PROJECTS

ModenixOS — Multi-Tenant SaaS eCommerce Store Builder

[Live Demo](#) | [Frontend Repo](#) | [Backend Repo](#)

- Designed and developed a SaaS-style eCommerce platform that enables users to create and customize independent online storefronts with product catalogs, branding, customer management, and order processing workflows.
- Implemented multi-tenant architecture with role-based access control (RBAC), store onboarding, team management, subscription-based plans, admin dashboard, and platform-level management features.
- Built complete eCommerce workflows including inventory-ready product management, order lifecycle, payment integration, coupon system, analytics dashboard, customer accounts, reviews, and AI-powered chatbot assistance.

Retail Flow — POS & Inventory Management System

[Live Demo](#) | [Frontend Repo](#) | [Backend Repo](#)

- Developed a full-stack POS and inventory management system with product, supplier, purchase, sales, and warehouse management features to streamline daily business operations.
- Implemented end-to-end procurement workflows including Purchase Order (PO), Goods Received Note (GRN), stock receiving, batch tracking, and automated inventory updates with audit history.
- Built secure business workflows with role-based access control, payment tracking, advanced filtering, pagination, data export, and scalable API-driven architecture for efficient store management.

Acadex — Classroom Collaboration Platform

[Live Demo](#) | [Frontend Repo](#) | [Backend Repo](#)

- Developed a classroom-first learning platform enabling students to join digital classrooms, organize subjects, share academic notes, collaborate through comments, and access student productivity tools.
- Implemented role-based authentication and permission management for students, class representatives (CR), and admins with note moderation, classroom management, and platform administration workflows.
- Integrated a RAG-based AI study assistant with real-time classroom communication, providing context-aware answers, summaries, study plans, and interactive learning support from class materials.

ACHIEVEMENTS

4th Place — Code_Sphere 2026 Hackathon (UUCPC): Developed **LostX**, an AI-powered lost-and-found platform.

Participant — Technovation25 Hackathon (Programming Hero): Built **SilentVoice**, an anonymous reporting platform.

CERTIFICATES

Complete Web Development Course — **Programming Hero**

Next Level Web Development — **Programming Hero**

EDUCATION

Bachelor of Science in Computer Science and Engineering

Uttara University | Expected Graduation: 2029

LANGUAGES

Bengali (Native) | English (Professional Working Proficiency)
